

Equity and Inclusion Office

Employment Equity Report 2012

EXECUTIVE SUMMARY

UBC has made commitments in its strategic plan to achieve greater intercultural understanding and to provide employees with suitable opportunities for career advancement, and to recruit the best staff and faculty, all of which requires that we monitor and improve the representation of faculty and staff across bargaining units. This Employment Equity Report constitutes UBC's commitment towards compliance with the Federal Contractors Program (FCP), which requires that employers of a certain size must survey their equity profile and develop an equity plan.

For the Vancouver Campus, Women are over-represented for almost half of levels of positions. There is a particularly high concentration of Women amongst the higher level positions as well as administrative and clerical positions. The number of Aboriginal Peoples is generally small; however, the number has increased from the year prior. The greatest under-representation of Aboriginal Peoples is amongst Senior Managers, and the greatest over-representation amongst Other Manual Workers. The representation of Visible Minorities is at a level above their representation in the Canadian workforce, yet below that of the Vancouver workforce. Representation by Visible Minorities has improved over the prior year. Persons With Disabilities are represented across all levels of position at UBC's Vancouver Campus, however Persons With Disabilities are under-represented and their representation declined over the year prior.

For the Okanagan Campus, Women are represented above the level of the external market. The number of Aboriginal Peoples is generally small; however, the number has increased slightly from the year prior. The representation of Visible Minorities remains at or above the level of the labour market among most levels of position, exceeds the regional norm, and has increased over the year prior. In addition, Persons With Disabilities are generally underrepresent amongst almost all levels of position and their representation declined over the year prior.

Regarding our hiring trends on the Vancouver Campus, we hire Women and Aboriginal Peoples at a higher rate than the external labour market. We are also recruiting Visible Minorities at a higher rate than our pre-existing representation, but still below the Vancouver labour market. We hire at a rate that is lower than our pre-existing representation for Persons With Disabilities, which is itself lower than the external labour market.

For University Professors at the Vancouver Campus, the results are more nuanced, in that our current representation and hiring trends for Visible Minorities exceed the national trend, but

fall short of the regional trend. As the national labour market is the normal recruiting pool for this level of positions, the regional under-representation is not the compelling concern.

For the Okanagan Campus, UBC hires Women and Aboriginal Peoples at a higher rate than the external market. The recruitment rate of Visible Minorities is higher than our pre-existing representation, and also above the average for the Kelowna labour market. However, we hire at a rate that is lower than our pre-existing representation for Persons With Disabilities, which is itself lower than the external labour market.

Comparing the faculty and staff representation by race and ethnicity, the Vancouver Campus has an over-representation of White, Arab, Black, Filipino, Japanese, Latin American, South East Asian, and West Asian, but an under-representation of Chinese, Aboriginal Peoples, Korean, and South Asian. The Okanagan Campus has a higher representation of almost all ethnicities compared to the local labour market, expect for Aboriginal Peoples, Filipino, and South East Asian.

Regarding sexual orientation and gender identity, 5.9% of the Vancouver Campus self-identifies as either lesbian, gay, bisexual or queer or an analogous term. For the Okanagan Campus, 4.1% of the workforce self-identifies as being a member of this group. In addition, less than one percent identifies as being transgender on the Vancouver and Okanagan Campuses.

Of those on the Vancouver Campus self-identifying as Persons With Disabilities, 31% indicate that they have a physical disability or impairment, 41% indicate they have an invisible disability or impairment, 62% indicate that they have an ongoing medical condition. We also find that 37% of Vancouver faculty and staff indicate that their disability requires some kind of workplace accommodation. Of those on the Okanagan Campus self-identifying as Persons With Disabilities, 29% indicate that they have a physical disability or impairment, 30% indicate they have an invisible disability or impairment, 46% indicate that they have an ongoing medical condition, and 58% indicate that their disability requires some kind of workplace accommodation.

This 2012 report incorporates several changes from the prior year's report. We chose to shorten the report to mostly focus on data that was required by the Federal Contractors Program. Additional tables were generated and are available on request, but they were not included in this report. Please refer to our Table Conversion Key, in the Appendix, for reference purposes to assist those who are comparing this year's tables to the year prior.

Introduction

The Equity and Inclusion Office envisions a community in which human rights are respected and equity is embedded in all areas of academic, work and campus life. Through its leadership, vision and collaborative action, the Equity and Inclusion Office will further UBC's commitment to excellence, equity and mutual respect.

Vision & Mission Statements, Equity and Inclusion Office

UBC treats employment equity, and human rights, as things that are integrated into our broader commitment towards excellence and mutual respect. We also regard equity and human rights as integrated into our academic pursuits, our working lives, and our involvement in the larger campus community.

The efforts of the Equity and Inclusion Office are part of a broader effort to advance a series of related goals, including several items related to our organizational strategy *Place and Promise*. These include our commitments to Aboriginal Engagement, Outstanding Work Environment, Intercultural Understanding, and repeated commitments to a respectful environment and a non-discriminatory environment which is committed to excellence.

Amongst our key efforts is this Employment Equity Report where we track and report on the representation of designated groups amongst different levels of position for faculty and staff. By "designated groups" we are referring to the four groups designated in the federal Employment Equity legislation; Women, Aboriginal Peoples, Visible Minorities, and Persons With Disabilities. By "levels of position" we are referring to Employment Equity Occupational Group (EEOG), a grouping of all staff into 15 categories based on National Occupational Codes.

The way we track and report this information, is to conduct the UBC Employment Equity Census Questionnaire which asks people to self-identify whether they regard themselves as members of one of the four designated groups. We provide cross-sectional analysis of this data by level of position, equity group, and campus (Vancouver or Okanagan) in order to identify areas where we face challenges and need to attempt to make improvements.

We also track our hiring trends, and we collect and report information on supplemental categories such as ethnicity, sexual diversity, and type of disability.

This report also constitutes UBC's commitment towards compliance with the Federal Contractors Program, which requires that employers of a certain size must survey their equity profile and

develop an equity plan, in order to receive federal contracts beyond a certain dollar amount. As UBC receives significant funding from the Government of Canada, we are committed to compliance to the legislation at the very least, and we will continue to pursue our own equity goals which are above and beyond those required by the legislation.

This 2012 report incorporates several changes from the prior year's report, and for those readers who are comparing reports between years, we point you to our table key in order to match table numbers and page numbers.

Regarding the level of participation in UBC's Employment Equity Census (also known as "return rate"), we should note that the 2012 questionnaire had a higher rate of participation than the year prior. For the Vancouver Campus, participation increased from 55.9% in 2011 to 57.3% in 2012. All levels of position in Vancouver saw an increased participation rate, with the exceptions of Supervisor – Crafts & Trades, Skilled Crafts & Trades, and Semi-Skilled Manual Workers. For the Okanagan Campus, participation increased from 67.6% in 2011 to 70.6% in 2012, with only three of the eleven levels of position reporting a decline. For more information, detailed tables regarding the return rate are provided in the Appendix.

Employment Equity Occupational Groups at UBC

All positions at UBC, either faculty or staff, are classified using the fifteen Employment Equity Occupational Groups (EEOGs) established by the federal government. Table 1 (below) lists these groups, examples of UBC positions in each category, and the geographic area from which we would normally recruit staff. Please note that some of the groups do not apply to the Okanagan Campus.

Table 1
Employment Equity Occupational Groups (EEOGs)

	Employment Equity		
	Occupational Group		Area of
#	(EEOG)	Examples of UBC Positions	Recruitment*
1.	Senior Managers	Associate Vice President, Dean, Deputy Vice Chancellor, President,	National
		Registrar, University Librarian, Vice President.	National

		Worker, Waiter/Waitress.	
13.	Semi-Skilled Manual	Clerk Driver, Farm Worker 1 to 5, Milker, Nursery & Greenhouse	
	Workers	Gardener, Printing Operator 2 and 3, Spray Painter, Truck Driver.	Municipal
14.	Other Sales & Service	Food Services Assistant, Gate Keeper, General Worker, Grocery Clerk,	
	Personnel	Janitor, Caretaker, Building Supplies Service Worker, Kiosk Attendant,	Municipal
		Residence Attendant, Service Worker: Ice Maker.	'
15.	Other Manual Workers	Labourer 2, Labourer 2 (Construction & Heavy), Labourer 3 (Special).	Municipal
	5	()	3 1

^{*} Area of Recruitment: National = "Canada" for both Campuses. Municipal = "Vancouver" for Vancouver Campus and "Kelowna" for the Okanagan Campus.

Representation of Designated Equity Group Members Among Staff and Faculty Vancouver Campus

In Tables 2-5 we provide information on representation of equity groups amongst UBC Vancouver Campus faculty and staff. The data is presented for each designated equity group in a separate table, and includes both 2011 and 2012 data. Changes in the representation of the designated equity groups from one year to the next, in most instances, are small and incremental. We also provide hiring trend data in Table 6 with additional analysis of the dynamic between our hiring and our pre-existing representation of equity groups.

Table 2
Representation of Women (October 31, 2012)
UBC Vancouver Campus

				Gender

n.a.= not applicable or not available

Women at the Vancouver Campus

As we can see in Table 2 above, Women at the UBC Vancouver Campus are represented above the census comparison for almost half of levels of position (EEOG), including such levels as Senior Managers, Middle and Other Managers, Professionals, Semi-Professionals & Technicians, Supervisors, Administrative and Senior Clerical, and Clerical Personnel. There is a particularly high concentration of Women amongst Professionals, Semi-Professionals and Technicians, and Supervisors. The Vancouver Campus also has a high concentration of Women amongst Administrative & Senior Clerical positions, where UBC has 87.8% of positions represented by Women, compared to an already-high census comparison in 81% Women.

Women are under-represented amongst University Professors, although we are within one percent of the census comparison of 39.6%. Women are also under-represented in areas such as Supervisors: Crafts & Trades (where we have no representation by Women whatsoever), Skilled Sales and Service, Skilled Crafts and Trades, Intermediate Sales & Service, Semi-Skilled Manual Workers, Other Sales & Service, and Other Manual Workers.

Table 3
Representation of Aboriginal Peoples (October 31, 2012)
UBC Vancouver Campus

	Vancouver Workforce Population (A	All Level of Position	1)		1.8%

n.a.= not applicable or not available

Aboriginal Peoples at the Vancouver Campus

As shown in Table 3 above, the number of employees who self-identified as Aboriginal Peoples is small (1.6% of survey respondents), however the number has increased slightly from the year prior. The low representation of this group may be the result of either the low response rate in the UBC Employment Equity Census, or low representation of this group in the broader workforce (i.e. 1.8% for greater Vancouver). As the numbers themselves are quite small, small changes in representation year-over-year appear to have no discernible pattern. For example we have new data on four levels of position for which we have census questionnaires submitted, but no representation by Aboriginal Peoples. Four levels have increased in representation and seven have declined... yet on average representation has gone up by one-tenth of a percent. In terms of high and low points, we would flag that we have the greatest under-representation of Aboriginal

Peoples amongst Senior Managers, and the greatest over-representation by Other Manual Workers.

Visible Minorities at the Vancouver Campus

The representation of Visible Minorities (Table 4, below) is at a level above their representation in the broader Canadian workforce, yet below that of the Vancouver workforce. However, we continue to improve in relation to the Vancouver workforce.

The representation of Visible Minorities remains at or above the level of the labour market among University Professors, Semi- Professionals and Technicians, Supervisors, Administrative and Senior Clerical, Skilled Sales and Service, Skilled Crafts and Trades, Clerical Personnel, Intermediate Sales and Service, and Other Sales and Service. Levels of position where Visible Minorities continue to be under-represented are Senior Managers, Middle and Other Managers, Professionals, Supervisors: Skilled Crafts and Trades, Semi-Skilled Manual Workers and Other Manual Workers.

In terms of changes from the year prior, UBC has fallen slightly behind on Professionals and pulled slightly ahead of Skilled Crafts and Trades, in comparison to the external market.

Table 4
Representation of Visible Minorities (October 31, 2012)
UBC Vancouver Campus

			orities		
	Level of Position	Respondents to 1	the UBC EE Censu	s Questionnaire	Comparison
#	(EEOG)	# 2012	2011%	2012%	to Census
1.	Senior Managers		3.3%	0.0%	8.7%
2.	Middle and Other Managers	104	22.9%	22.7%	34.0%
3.	University Professors	268	16.8%	18.0%	15.1%
4.	Professionals	568	33.2%	32.7%	33.2%
5.	Semi-Professionals & Technicians	307	39.6%	39.5%	33.3%
6.	Supervisors	75	56.9%	60.5%	38.0%
7.	Supervisors: Crafts & Trades	2	11.8%	14.3%	27.6%
8.	Administrative & Senior Clerical	205	31.5%	32.5%	30.8%
9.	Skilled Sales and Service	25	75.7%	78.1%	45.3%
10.	Skilled Crafts and Trades	24	27.3%	29.6%	29.0%
11.	Clerical Personnel	172	46.6%	48.9%	38.9%
12.	Intermediate Sales & Service	95	49.2%	49.5%	43.1%
13.	Semi-Skilled Manual Workers	4	33.3%	28.6%	47.6%
14.	Other Sales and Service	146	63.8%	62.9%	51.3%
15.	Other Manual Workers	8	33.3%	32.0%	45.6%
	Total	2,003	31.9%	32.4%	n.a.
	National Workforce Population (All L	evels of Position)			15.3%
	Vancouver Workforce Population (A	ll Levels of Positio	n)		38.4%

n.a.= not applicable or not available

Persons With Disabilities at the Vancouver Campus

Persons With Disabilities (Table 5, below) are represented across all levels of position at UBC's Vancouver Campus. The representation of Persons With Disabilities remains below the external labour market, where the Vancouver workforce reports 6.2% of the population being Persons With Disabilities and Vancouver reporting 5.1% of the faculty and staff at the Vancouver Campus. It is interesting, however, that UBC has a higher-than-market representation for Senior Managers, Middle and Other Managers, Semi-Professionals & Technicians, and a wide range of the more junior positions. UBC has an under-representation amongst University Professors, Professionals, Supervisors, and Administrative & Senior Clerical. As these latter groups are somewhat more heavily populated than the others, this would explain why our overall average is below the external market.

Table 5
Representation of Persons With Disabilities (October 31, 2012)
UBC Vancouver Campus

			Persons with Disabilities

14.	Other Sales and Service	21	12.1%	9.1%	6.2% ^b							
15.	Other Manual Workers	3	12.5%	12.0%	6.2% ^b							
	Total	317	5.1%									
	National Workforce Population (All I	Levels of Position)			4.9%							
	Vancouver Workforce Population (A	II Levels of Position	on)		6.2%							

Footnotes:

^a = For Comparison to Census data, the data combines Senior Managers with Middle and Other Managers.

b = Due to small sample size and lack of reliability of comparison to census data for each level of position, we have only provided the average for all levels in the Vancouver area. n.a. = Not applicable or not available.

New Hires at the Vancouver Campus

In this section, we review our hiring rates (Table 6 below), in comparison to our pre-existing representation of staff and faculty by equity group.

For Women, UBC hires at a higher rate than the external market; 62.7% of our new staff and faculty are Women, compared to 47.9% of Canadian workers and 48.4% of Vancouver workers being Women. We hire a higher-than-average percentage of Women for all levels except for Supervisors, Supervisors: Crafts & Trades, Skilled Sales and Service, and Other Manual Workers.

For Aboriginal Peoples, we hire at a higher rate than most of our external markets; 2.3% of our new faculty and staff are Aboriginal Peoples compared to 1.8% of Vancouver workers being Aboriginal Peoples. Vancouver is our target recruiting market for most levels of positions (i.e. excluding Senior Managers and University Professionals, which is a national labour market). Our representation of Aboriginal Peoples amongst new hires is higher than the benchmark for such levels as Professionals, Administrative & Senior Clerical, Clerical Personnel, and Intermediate Sales & Service. These are mostly areas where we already have relatively strong representation. Meanwhile, we have recruited nobody who is identified as Aboriginal Peoples into the ranks of Supervisors, where we have an under-representation.

For Visible Minorities, we see that we are recruiting at a higher rate (34.2% overall) than our preexisting representation (32.4% overall) but still below the Vancouver labour market (38.4% overall). In particular, we are recruiting both below our pre-existing representation as well as the external market for such levels as Middle and Other Managers and Professionals. We appear to be catching-up or pulling ahead on the hiring in such areas as Supervisors, Administrative & Senior Clerical, Clerical Personnel, Intermediate Sales & Service, and other Sales & Service. For other groups, the results are mixed or we have insufficient data to report.

For University Professors, the results are more nuanced, in that 18.0% of our current faculty and 27.3% of new hires are Visible Minority, which in both cases exceeds our national labour market of 15.3%. However, if we had not already chosen the national labour market for this group, we would compare less favourably to a Vancouver average of 38.4% Visible Minority. In brief, we exceed the national norm but lag behind the local norm.

For Persons With Disabilities, we recruit at a lower level (at 3.7%) than our pre-existing representation (at 5.1%), which is itself lower than the external market of 6.2%. There is only one level, Semi-Professionals & Technicians, where our baseline and hiring trend exceed the external market. Otherwise, the 2012 hiring trends appear to point towards declining representation amongst Persons With Disabilities.

x = data suppressed due to insufficient data to report.

Representation of Designated Equity Group Members among Staff and Faculty Okanagan Campus

In Tables 7-10 we provide information on representation of equity groups amongst UBC Okanagan Campus faculty and staff. The data is presented for each designated equity group in a separate table, and includes both 2011 and 2012 data. Changes in the representation of the designated equity groups from one year to the next, in most instances, are small and incremental. We also provide hiring trend data in Table 11 with additional analysis of the dynamic between our hiring and our pre-existing representation of equity groups.

Table 7
Representation of Women (October 31, 2012)
UBC Okanagan Campus

Footnotes:

n.a. = not applicable or not available.

Please note that the UBC Okanagan Campus does not have any positions that are matched to level of position (EEOG) number 6, 7, 9, 12, 13 and 15. However, we have provided the rows with n.a. in each cell to allow easier comparison to other tables.

x = data suppressed due to insufficient data to report.

Women at the Okanagan Campus

As we can see in Table 7 above, Women at the UBC Okanagan Campus are represented above the census comparison for seven levels of position (EEOG), including such levels as Senior Managers, Middle and Other Managers, University Professors, Professionals, Semi-Professionals & Technicians, Administrative and Senior Clerical, and Clerical Personnel. There is a particularly high concentration of Women amongst Professionals, Semi-Professionals and Technicians. The Okanagan Campus also has a high concentration of Women amongst Administrative & Senior Clerical positions, where UBC has 92.2% of positions represented by Women, compared to an already-high census comparison in 83.9% Women.

For the Okanagan Campus, there are four different levels of position for which we cannot report data (designated as "n.a.") and four additional levels of position for which we are reporting survey respondents for the first time... but with nobody indicating that they are Women. The latter categories for which we report 0% Women include Skilled Crafts and Trades and Other Sales and Service. We should note that because of the low response rate, and the fact that faculty and staff are being placed in this level of position for the first time in 2012, should motivate us to be cautious about indicating that these levels have an under-representation of Women.

Aboriginal Peoples at the Okanagan Campus

As shown in Table 8 below, the number of employees who self-identified as Aboriginal Peoples is small (2.2% of survey respondents), and is below the Kelowna average of 3.6%. However the number has increased from the year prior. The low representation of this group may be the result of either the low response rate in the UBC Employment Equity Census, or low representation of this group in the broader workforce.

We should note that the UBC Okanagan Campus has a higher-than-market representation amongst most of the more senior levels of position, including Senior Managers, Middle and Other Managers, University Professors, and Professionals. For other levels of position the findings are more varied and increasingly difficult to determine because of small sample size. In general, we can interpret that the Okanagan Campus has a strong representation of Aboriginal Peoples in senior ranks, but we would have to have an under-representation of Aboriginal Peoples amongst the more junior levels in order for the Campus overall average to be below the Kelowna norm.

	Kelowna Workforce Population (All I	Levels of Position			5.2%						

n.a. = not applicable or not available.

Please note that the UBC Okanagan Campus does not have any positions that are matched to level of position (EEOG) number 7, 9, 12, and 15. However, we have provided the rows with n.a. in each cell to allow easier comparison to other tables.

x = data suppressed due to insufficient data to report.

Visible Minorities at the Okanagan Campus

The representation of Visible Minorities (Table 9, above) is at a level below their representation in the broader Canadian workforce, yet above that of the Kelowna workforce. Representation by Visible Minorities has increased over the year prior.

The representation of Visible Minorities remains at or above the level of the labour market among seven levels of position including Senior Managers and University Professors. For those levels where we have an under-representation, these tend to be in areas where we have new matches in our equity questionnaire, for which we should interpret the data with caution. Overall, the UBC Okanagan Campus has a strong representation by Visible Minorities in those cases where we are confident in the underlying data.

Table 10
Representation of Persons With Disabilities (October 31, 2012)
UBC Okanagan Campus

	National Workforce Population (All	Levels of Position)			n.a.(^c) 4.9%					
	Kelowna Workforce Population (All	Levels of Position)			6.2%					

n.a. = Not applicable or not available.

Please note that the UBC Okanagan Campus does not have any positions that are matched to Level of Position (EEOG) number 7, 9, 12, and 15. However, we have provided the rows with n.a. in each cell to allow easier comparison to other tables.

x = data suppressed due to insufficient data to report.

Persons With Disabilities at the Okanagan Campus

Persons With Disabilities (Table 10, above) have a level of representation on the Okanagan Campus, at 4.6%, which is below the national workforce average of 4.9% and also below the Kelowna workforce average of 6.2%. In general, we under-represent our comparison market in all levels of position with the exception of University Professors, where we have 6.6% Persons With Disabilities compared to the national average of 4.5%.

^a = For Comparison to Census data, the data combines Senior Managers with Middle and Other Managers.

^b = Due to small sample size and lack of reliability of comparison to census data for each level of position, we have only provided the average for all levels in the Kelowna area.

New Hires at the Okanagan Campus

In this section, we review our hiring rates (Table 11 below), in comparison to our pre-existing representation of staff and faculty by equity group, for the Okanagan Campus.

For Women, UBC hires at a higher rate than the external market; 69.6% of our new staff and faculty are Women, compared to 47.9% of Canadian workers and 48.6% of Kelowna workers being Women.

For Aboriginal Peoples, we hire at a higher rate than our external markets; 4.8% of our new staff and faculty are Aboriginal Peoples compared to 3.1% of the national workforce and 3.6% of the Kelowna workforce. Our representation of Aboriginal Peoples amongst new hires is higher than the benchmark for such levels as University Professors, Professionals, and Semi-Professionals & Technicians.

For Visible Minorities, we see that we are recruiting at a higher rate (13.5% overall) than our preexisting representation (11.7% overall) and above the Kelowna average of 5.2%. We recruited a strong representation from Visible Minorities into the ranks of University Professors, Professionals, Semi-Professionals & Technicians, Administrative & Senior Clerical, and Clerical Personnel.

For Persons With Disabilities, we recruit at a lower level (at 2.9%) than our pre-existing representation (at 4.6%), which is itself lower than the external market of 6.2%. There are only two levels, University Professors and Clerical Personnel, where our hiring trend exceeds the external market. Otherwise, the 2012 hiring trends appear to point towards declining representation amongst Persons With Disabilities.

a = Due to small sample size and lack of reliability of Comparison to Census data for each Level of Position, we have only provided the average for all levels in the Kelowna area.

n.a. = Not applicable or not available.

x = data suppressed due to insufficient data to report.

Supplementary Survey Questions

The UBC Employment Equity Census Questionnaire includes five supplementary questions which are not requirements of the Federal Contractors Program, but UBC has chosen to survey. For supplementary questions, we survey Race/Ethnicity, Sexual Orientation and Gender Identity, and Details Regarding Persons With Disabilities. UBC recognizes that a wide range of groups have been historically discriminated against in ways that limit their full and active participation in the workforce, and there may also be differences within broadly-defined equity groups.

Staff and faculty may decline to answer any or all of the supplementary questions, and all responses are confidential. The response rate for the supplementary questions tends to be lower than that of the designated equity groups.

Representation by Race/Ethnicity

Vancouver Campus

Comparing the faculty and staff representation by race and ethnicity (Table 12 below), we find that UBC reports a workforce that is 66.4% White compared to a labour market comparison of 58.3%, which is a difference of 8.1%. Notably, in the Vancouver region 18.2% of the local workforce is Chinese, but at UBC only 15.5% of staff and faculty are Chinese. UBC under-represents the Vancouver workforce in such ethnicities as Aboriginal Peoples, Chinese (as discussed), Korean, and South Asian. By contrast, our staff and faculty are representative of the local population or has a higher representation than the Vancouver workforce, for such ethnicities as Arab, Black, Filipino, Japanese, Latin American, South East Asian, and West Asian.

Table 12
Representation by Race/Ethnicity (October 31, 2012)
UBC Vancouver Campus

		Comparison			
Race/Ethnicity	2009	2010	2011	2012	to Census
Aboriginal Peoples	1.3%	1.3%	1.3%	1.5%	1.9%
Arab	0.9%	0.6%	0.5%	0.6%	0.4%
Black	0.8%	0.8%	0.9%	1.0%	1.0%
Chinese	15.4%	15.3%	15.3%	15.5%	18.2%

South Asian	3.9%	4.2%	4.3%	4.5%	9.9%
South East Asian	2.3%	2.2%	2.2%	2.0%	1.6%
West Asian	1.0%	1.2%	1.2%	1.3%	1.3%
White	68.4%	67.3%	67.1%	66.4%	58.3%

Okanagan Campus

Comparing the faculty and staff representation by race and ethnicity (Table 13 below), we find that UBC reports a workforce that is 84.9% White compared to a local labour market which is 94.8% White, which is a difference of 9.9% in the direction of *greater* ethnic diversity. UBC underrepresents the Kelowna workforce in such ethnicities as Aboriginal Peoples, Filipino, and South East Asian. However, in all other categories UBC has a higher representation of ethnicities than the local labour market.

Table 13
Representation by Race/Ethnicity (October 31, 2012)

White	83.5%	84.7%	86.3%	84.9%	94.8%

Representation by Sexual Orientation and Gender Identity

Our survey asks employees to indicate whether they self-identify as persons who are lesbian, gay, bisexual or queer or an analogous term (Table 14 below). For the Vancouver Campus, 5.9% of the workforce self-identifies as being a member of this broader category, which is down slightly from the year prior but still within a 5.5% to 6.1% range reported over the past. For the Okanagan Campus, 4.1% of the workforce self-identifies as being a member of this group, which is up slightly from the year prior but within the 3.8% to 4.4% range reported in the past.

In a separate question, we ask faculty and staff whether they self-identify as transgender. Less than one percent identifies as being transgender on the Vancouver and Okanagan Campuses.

Table 14

Representation by Sexual Orientation and Gender Identity (October 31, 2012)

UBC Vancouver and Okanagan Campuses

		ay, Bisexual, alogous Term ^a	Transgender or Analogous Term ^b			
	Vancouver	Vancouver Okanagan		Okanagan

b = People were asked: "Do you self-identify as a person who is transgender or an analogous term?"

n.a. = not applicable or not available

Representation of Persons With Disabilities by Type of Disability

Of the staff and faculty who participated in the UBC Employment Equity Census Questionnaire, those who had self-identified as Persons With Disability were asked to respond to four supplementary questions (Table 15 below).

Of those on the Vancouver Campus self-identifying as Persons With Disabilities, 31% indicated that they had a physical disability or impairment, 41% indicated they had an invisible disability or impairment, 62% indicated that they had an ongoing medical condition, and 37% indicated that their disability requires some kind of workplace accommodation. Self-reporting in all four categories has gone up from 2009-2012.

Of those on the Okanagan Campus self-identifying as Persons With Disabilities, 29% indicated that they had a physical disability or impairment, 30% indicated they had an invisible disability or impairment, 46% indicated that they had an ongoing medical condition, and 58% indicated that their disability requires some kind of workplace accommodation. Regarding the types of disability, the three different disability types have declined from 2009-2012, however the requirement for workplace accommodation has gone up.

Representation of Designated Equity Groups by Bargaining Unit

Tables 16 and 17 (below) show the representation by the equity groups according to bargaining unit.

Vancouver Campus

At UBC's Vancouver Campus (Table 16, below) 55.6% of staff and faculty are Women, and there is a particularly high representation by Women in such bargaining units as BCGEU (Child Care), CUPE 2278 (Non-Credit Instructors / English Language Institute), CUPE 2950, Excluded M&P, Exec Admin, AAPS, and Technicians & Research Assistants (Non-Union Techs).

A baseline of 1.6% of faculty and staff are Aboriginal Peoples, which are more predominant in such groups as BCGEU (Child Care), CUPE 116, Excluded M&P, Exec Admin, IUOE 882, and AAPS.

Visible Minorities, which make up 32.3% of staff and faculty, are more highly represented amongst BCGEU (Child Care), CUPE 116, CUPE 2950, Exec Admin, IUOE 882, and Technicians & Research Assistants (Non-Union Techs).

A baseline of 5.1% of faculty and staff are Persons With Disabilities, which are more predominant in such bargaining units as CUPE 116, CUPE 2278 (Non-Credit Instructors / English Language Institute), CUPE 2950, Exec Admin, Senior Executives, and Technicians & Research Assistants (Non-Union Techs).

- a = BCGEU UBC-Vancouver includes BCGEU UBC-Vancouver and BCGEU UBC-Vancouver Kids Club.
- b = CUPE116 includes CUPE116 (Aquatic Centre), CUPE116 (Clerk, Secretary, Bookstore), and CUPE116 (Service, Techns, Trades).
- c = CUPE2950 includes CUPE2950 (Chan Centre) and CUPE2950 (Clerk, Secretary, Library).

Please note that for reasons of small sample size the following groups have been excluded: Agassiz Farm Workers and Non Union Childcare Auxiliary.

Table 17
Representation of Designated Equity Groups by Bargaining Unit (October 31, 2012)
UBC Okanagan Campus

	Gender				Aboriginal Peoples		Visible Minorities		Pers. w/ Disabilities	
Bargaining Unit	Women	Men	Total	% Women	Number	Percent	Number	Percent	Number	Percent
BCGEU UBC-Okanagan	186	71	257	72.4%	2	1.2%	14	8.6%	3	1.8%
Executive Admin (non- union clerical)	11		11	100.0%	1	12.5%	1	12.5%	1	12.5%
Faculty (Faculty Association)	193	226	419	46.1%	3	1.1%	46	17.2%	17	6.4%
Faculty (Non-Faculty Association)	9	9	18	50.0%		0.0%	1	16.7%		0.0%
Management & Professional (AAPS)	166	92	258	64.3%	7	4.1%	11	6.4%	8	4.7%
Grand Total	565	398	963	58.7%	13	2.1%	73	11.9%	29	4.6%

The following groups have been excluded for privacy reasons due to the small number of incumbents: Excluded M&P, Service Unit Directors, Sr. Executives.

Okanagan Campus

At UBC's Okanagan Campus (Table 17, above) 58.7% of staff and faculty are Women, and there is a particularly high representation by Women in such bargaining units as BCGEU Okanagan, Exec Admin, and AAPS. A baseline of 2.1% of faculty and staff are Aboriginal Peoples, which are more predominant in such groups as Exec Admin and AAPS. Visible Minorities, which make up 11.9% of faculty and staff, are more highly represented amongst Exec Admin, Faculty (Faculty Association), and Faculty (No-Faculty Association). A baseline of 4.6% of staff and faculty self-identify as Persons With Disabilities, which are more predominant in such bargaining units as Exec Admin, Faculty (Faculty Association), and AAPS.

Conclusion

In keeping with UBC's commitments to achieve its strategic goals and also to comply with the requirements of the Federal Contractors Program, this report provides several insights about our profile of faculty and staff based on equity designated groups and levels of position.

For the Vancouver Campus, Women are represented above the census comparison for almost half of levels of position. The number of Aboriginal Peoples is small and below that of the regional workforce, but has increased slightly from the year prior. The number of Visible Minorities is at a level above that of the Canadian workforce but below that of the Vancouver workforce. However, we continue to improve our representation of Visible Minorities year-over-year. Persons With Disabilities are represented at a level that is below the external labour market.

Regarding our hiring trends on the Vancouver Campus, we hire Women at a rate which is higher than the external market. For Aboriginal Peoples, we hire at a rate that is higher than our external markets. For Visible Minorities, we are recruiting staff at a rate that is higher than our pre-existing levels, but still at a level that is lower than the local labour market.

For University Professors on the Vancouver Campus, we should note that 18.0% of our current faculty and 27.3% of new hires are Visible Minority, which in both cases exceed our national labour market comparison of 15.3%. However, we fall behind the local labour market which is 38.4% Visible Minority. Since this level of position recruits at the national level, UBC is in the unfortunate position of exceeding our legitimate benchmark but having the appearance of falling behind based on word-on-the-street local comparisons.

For the Okanagan Campus, Women are represented above the level of the external market both overall and for a wide range of levels of position. For Aboriginal Peoples, representation is below the Kelowna average, but has increased from the year prior, and also tends to have a higher of representation in the more senior levels of position. For Visible Minorities, UBC has representation above the Kelowna workforce and this representation has increase over the year prior. In addition, Persons With Disabilities are under-represented overall and in most levels of position.

Regarding our hiring trends on the Okanagan Campus, we hire at a rate that is higher than our external market for both Women and Aboriginal Peoples. We are recruiting Visible Minorities at a higher rate than our pre-existing complement of faculty and staff, and also above the average for the Kelowna labour market. For Persons With Disabilities, we recruit staff at a lower level than our pre-existing representation, which is itself lower than the external labour market.

APPENDIX

Table Conversion Key

In this table (Table 18 below), we list the tables provided in this year's report in sequential order, and also provide the table number and title in the prior year's report (i.e. 2011). This table is intended to assist those who are comparing data year-over-year. We should note that in this year's 2012 Report we chose to shorten the Report to mostly focus on data that was required by the Federal Contractors Program. Additional tables were generated and are available on request, but they were not included in this report. These include a variety of tables regarding women and faculty, and distribution of those in equity groups based on administrative unit. Please note that we have also dropped any comparisons of students to faculty and staff; while meaningful in many respects, this information is not directly relevant to the purposes of this report.

Return Rate of the UBC Employment Equity Census Questionnaire (October 31, 2012)

This is the fifth Employment Equity Report at UBC that is exclusively using the data gathered from the UBC Employment Equity Census Questionnaire initiated in November 2008. The data used throughout this report is the snapshot of questionnaire results as of October 31, 2012.

Tables 18-19 shows the "return rate" or our percentage participation rate compared to the baseline population, for UBC's Employment Equity Census Questionnaire by staff and faculty across UBC's Vancouver and Okanagan. The return rate is 57.3% for the Vancouver Campus which reflects an increase over the prior three years, but below the rate of the first year's survey in 2008. The return rate is 70.6% for the Okanagan Campus, which also reflects an increase over the three years prior, but below the rate of the first year's survey in 2008.

The return rate also varies across level of position. At UBC's Vancouver Campus, the highest return rate remains among Senior Managers and Middle and Other Managers. At UBC's Okanagan Campus, return rates are highest amongst Administrative & Senior Clerical, and Skilled Crafts and Trades. Return rates have largely increased incrementally with the occasional exception.

Methodology Notes

The workforce analysis compares UBC's internal workforce of designated equity group members (i.e., Women, Visible Minorities, Aboriginal Peoples, and Persons With Disabilities) with each group's representation in the relevant external labour pool. This is done in order to determine the degree of equity representation in each of the "Level of Position," technically known as Employment Equity Occupational Groups (EEOGs). Determining under-representation and concentration of designated equity group members at UBC makes it possible to develop realistic goals and timetables in achieving greater equity.

The terms "Comparison to Census" and "external labour market" are used to describe people 15 years of age or older who worked in Canada at any time from January 1, 2005 until May 2006 (the time of the last Canadian Census). In prior years' reports this external comparison data was described as "Availability Data" to reflect labour market availability, however we have attempted to use plain language. Canadian labour force data is drawn from the 2006 Canadian Census Employment Equity Data Report, except for Persons With Disabilities, which uses data from the 2006 Participation and Activity Limitation Survey conducted by Statistics Canada. In the latter case, the data refers to people aged 15 to 64 years and who worked sometime in the reference period, October 30, 2006 to February 28, 2007.

Revised data from the Canadian Census from 2011 is expected to become available in late Summer of 2014 and was not available at the time of writing this report.

UBC uses external labour market data at the national level for Senior Managers and University Professors. For all other levels of position we use market data based on municipality, as described in Table 1 of this Report.

For the purposes of this report, numbers of five or less in an overall occupational category are suppressed. We do so for two reasons. First, reporting responses when there are only a few people in an occupational category may have the effect of disclosing personal information. Second, data from such a small sample may be misleading or lead to inaccurate conclusions.

This report was written in February of 2014 as a combined effort involving staff at the Equity and Inclusion Office, Planning and Institutional Research, UBC Human Resources, and with some use of the pre-existing wording of the author of prior year's reports.
